Computer—A Magic Machine

Learning Objective

- ♦ Natural and Man-made Things
- ♦ Machines
- ♦ Types of Machines
- ♦ Uses of Machines
- ♦ Types of Computers
- ♦ Computer—A Smart Machine

Warm Up

Creativity and critical thinking CG-5.1

Look at the pictures and identify the names.

1

2

3

4

1

2

3

4

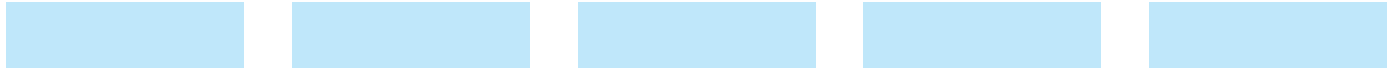

Now, take the first letter of each name and make a new word.

The new word is _____.

Natural and Man-made Things

- ★ God has given us many things. These are called **natural things**.
- ★ Here are the pictures of some natural things. Can you name them?

- ★ Things made by man are called man-made things.
- ★ So, machines are man-made things.
- ★ We see machines all around us.

It's a Fact!

Abacus is the first machine that was made to count and solve sums.

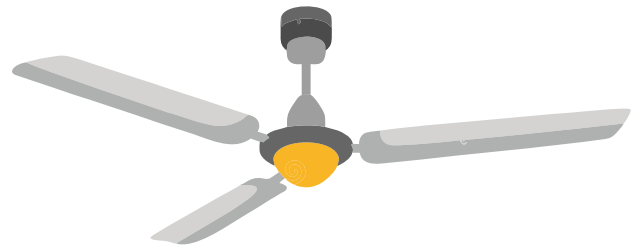

Machines

Let us learn about some machines. All of these work on electricity.

Fan

- ★ When we feel hot, we use a fan.
- ★ It spreads a lot of air.
- ★ It makes us feel cooler.

Television

We watch cartoons and movies on the television.

Juicer

Juicer crushes fruits and vegetables. It gives us fresh juice.

Washing Machine

We use a washing machine to wash our clothes.

Types of Machines

Some machines run on electricity and some by human efforts. Here are pictures of few such machines.

Air Conditioner

Microwave Oven

Bicycle

Scissors

Some machines help us to travel faster and they work on fuel.

Car

Helicopter

Uses of Machines

- ★ Machines help us do our work.
- ★ They make our work easy.
- ★ We can work faster with the help of machines.

Activity Corner

Find the machines used in our daily life using the picture clues.

Connecting to real-life applications CG-3.3

W	X	R	N	W	Z	G	Z	A	C	H	I	R	C	I
T	R	T	X	T	Y	V	U	I	S	T	O	T	Y	X
B	T	U	Z	J	C	E	V	S	X	I	E	L	C	A
F	F	Y	J	U	L	T	A	I	S	U	O	K	L	L

S	T	R	T	E	L	E	V	I	S	I	O	N	A	E
G	Q	T	T	R	L	C	V	O	S	B	P	T	W	N

Let us learn about a special machine today.

Children! Look at the picture.

What do we see in this picture?

What are the children working on?

Can you guess what is it?

Yes! You are right.

It is a computer.

It's a Fact!

Computers have fans inside them to keep them cool; otherwise they will get too hot and stop working.

Types Of Computers

There are different types of computers.

This is a DESKTOP COMPUTER.

We keep it on our desk.

This is a LAPTOP COMPUTER.

It can be kept on our lap.

We can carry it anywhere.

This is a TABLET COMPUTER.

We can touch on its screen.

This is a SMARTPHONE.

A smartphone is a mobile phone.

We can make phone calls with it.

It works as a computer.

Activity Corner

Fine motor skills & coordination

CG-2.6

Join the dots. Colour the picture using crayons. Also paste a picture of the computer in the given space.

Paste the picture here.

Computer—a Smart Machine

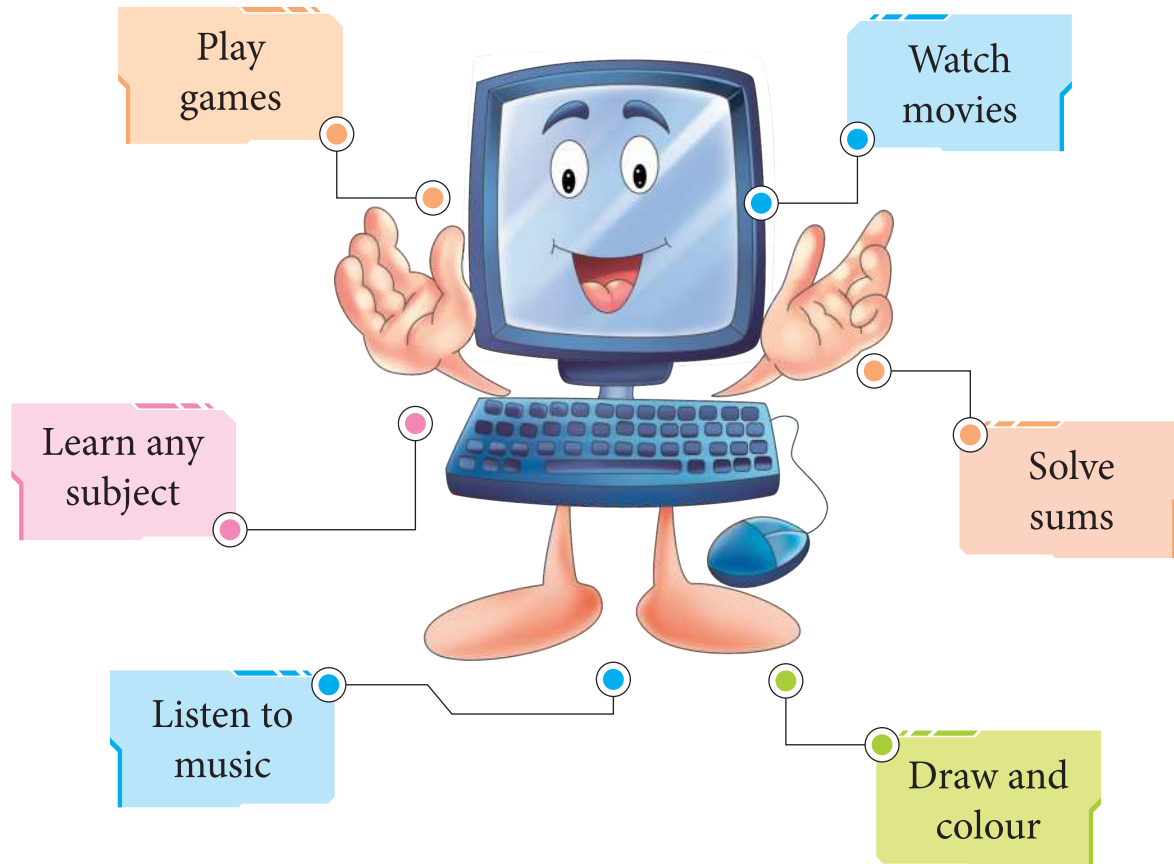

- ★ Computer is also a machine.
- ★ It can do many jobs.
- ★ It can store lots of information.
- ★ It can work for long hours and does not get tired.

It's a Fact!

Supercomputers are also a type of computers. They are the biggest, fastest and most expensive of all computers.

Do you know what we can do on the computer?

Summary

Understanding Computers and Machines

CG-1.6, 4.2

- God has given us natural things. Other things are man-made.
- Machines help us to do our work quickly.
- Desktop, Laptop, Tablet and Smartphone are different types of computers.
- Computer is a Smart Machine. It works on electricity.
- It can work for long hours and does not get tired.
- We play games, listen music, study, draw and colour through computers.

Tech. Terms

Language/Vocabulary Development

CG-1.7, CG-2.8

- Man-made** : Things which are made by man
- Machines** : Things which help us do our work faster and easier
- Laptop Computer** : Computer which can be carried anywhere
- Smartphone** : A mobile phone which can be used as a computer

Parts of a Computer

Learning Objective

- Computer and Its Parts
- Keyboard
- Monitor
- CPU Box
- Mouse
- Standard Computer System

Critical thinking and Reasoning

CG-4.3

These are things that look similar to computer parts; identify them.

Our body has different parts.
We see with our eyes. We hear with our ears.
We smell with our nose. We feel with our skin.
Like our body, the computer is also made up of different parts.

It's a Fact!

Just like we have parts inside our body which we cannot see, a computer has parts inside it too.

Computer And Its Parts

The four basic parts of a computer are as follows :

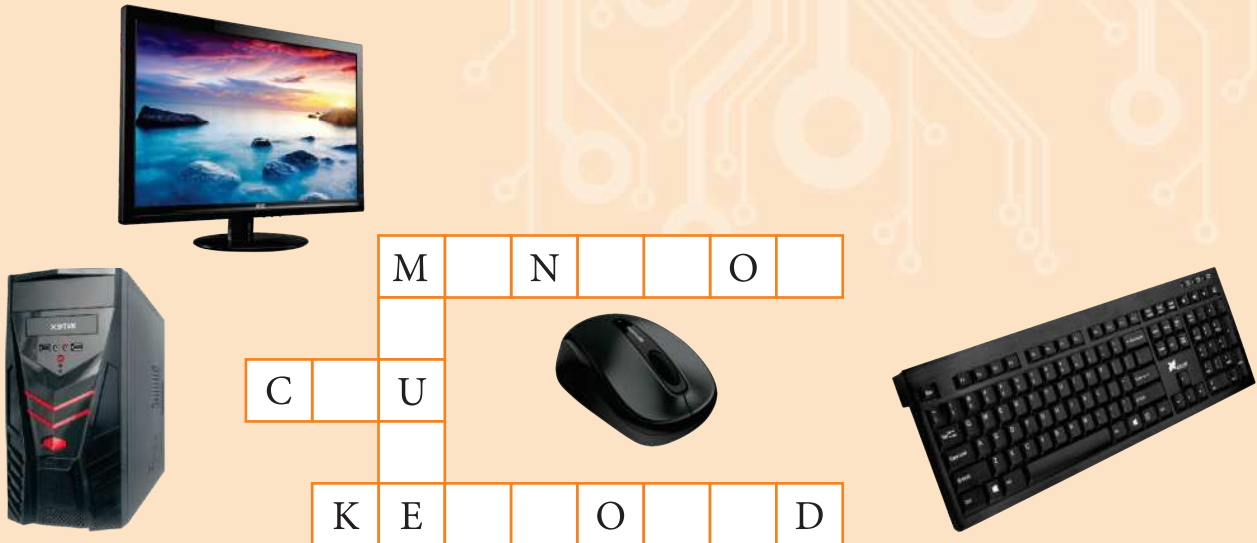

Activity Corner

Memory & Recall

CG-5.1

Look at the pictures carefully and fill in the crossword.

You have just labelled the four main parts of a Computer :

- ★ Monitor
- ★ Keyboard
- ★ Mouse
- ★ CPU Box

It's a Fact!

Charles Babbage is known as the Father of Computers.

Now, let's learn about them.

Monitor

This is a monitor.

A monitor looks like a television screen.

What we do on the computer is shown on the computer screen.

You can watch movies, videos and pictures on it with your friends.

Mouse

This is the computer's mouse. It has two buttons and a scroll wheel.

We use the mouse to point at different things on the screen.

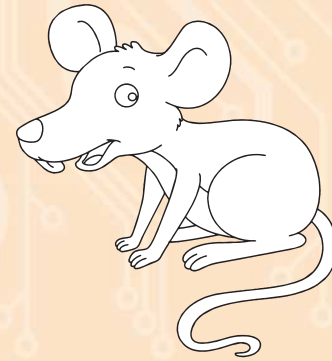

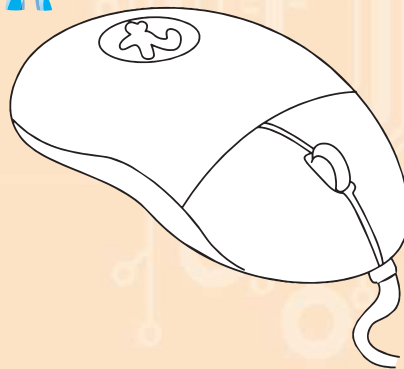

Activity Corner

Creativity CG-6.3

Colour the computer's mouse.

Keyboard

This is a keyboard. It is used to type. The small buttons on it are called **keys**.

Keys have alphabets, numbers or characters written on them.

Activity Corner

Numeracy / Basic Math Skills CG-6.3

Count and write the number of keyboards given below.

Number of keyboards =

CPU Box

The full form of CPU is CENTRAL PROCESSING UNIT.

Our brain controls us.

Just like that, **CPU is the brain of the computer.**

It helps the computer to do all the work.

Central Processing Unit is the part of the CPU Box.

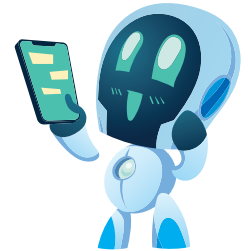

Standard Computer System

These four basic parts of the computer make the standard computer system.

Without any of these parts, a computer cannot work.

There are more things that we can connect with our computer.

We will learn about them later.

Summary

Observation, Classification, Digital literacy

CG-6.1.2, 6.3

- A computer has four main parts — Monitor, Keyboard, CPU Box and Mouse.
- A monitor looks like a TV screen.
- Mouse is used for pointing at things on the screen.
- Keyboard is used for typing.
- CPU is the brain of a computer.

Tech. Terms

Language/Vocabulary Development

CG-1.7, CG-2.8

Monitor : A monitor is used to display the work going on inside the computer.

Mouse : A mouse is used to point and select things on the computer screen.

Keyboard : A keyboard is used to enter data and commands into the computer using the different keys.

CPU Box : CPU is the brain of the computer and is used to store all the information.

Brain Play

A. Fill in the blanks.

Conceptual Understanding

CG-3.3

Central Processing Unit keys TV brain monitor

1. Small buttons on the keyboard are called _____.
2. Full form of CPU is _____.
3. _____ shows what you are doing on the computer.

4. The monitor looks like a _____.
5. The CPU is the _____ of a computer.

B. Put a tick (✓) against the correct statement and a cross (✗) against the wrong one.

Reading and Comprehension

CG-3.3

1. Monitor shows us cartoons and movies.
2. A mouse of a computer can run and eat.
3. Keyboard has only 5 keys.
4. A keyboard does not help us to type numbers and alphabets.
5. CPU stands for – Centrol Processing Unit.

☐
☐
☐
☐
☐

C. Tick (✓) the correct option.

- B. Visit the computer lab and count the number of :

1. Monitors ☐ 2. Keyboards ☐
3. Mouse ☐ 4. CPU Boxes ☐

3

Keyboard and Mouse

Learning Objective

- ◆ Keys on the keyboard
- ◆ Alphabet Keys
- ◆ Number Keys
- ◆ Special Keys
- ◆ Mouse
- ◆ Types of Mouse
- ◆ Holding a Mouse, Mouse Actions

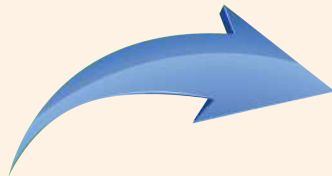

Warm Up

Recall/connect concepts CG-1, CG-1.4

Here are some mixed-up words about a computer mouse. Look at the pictures to find the right words.

TUOBTN

RWARO

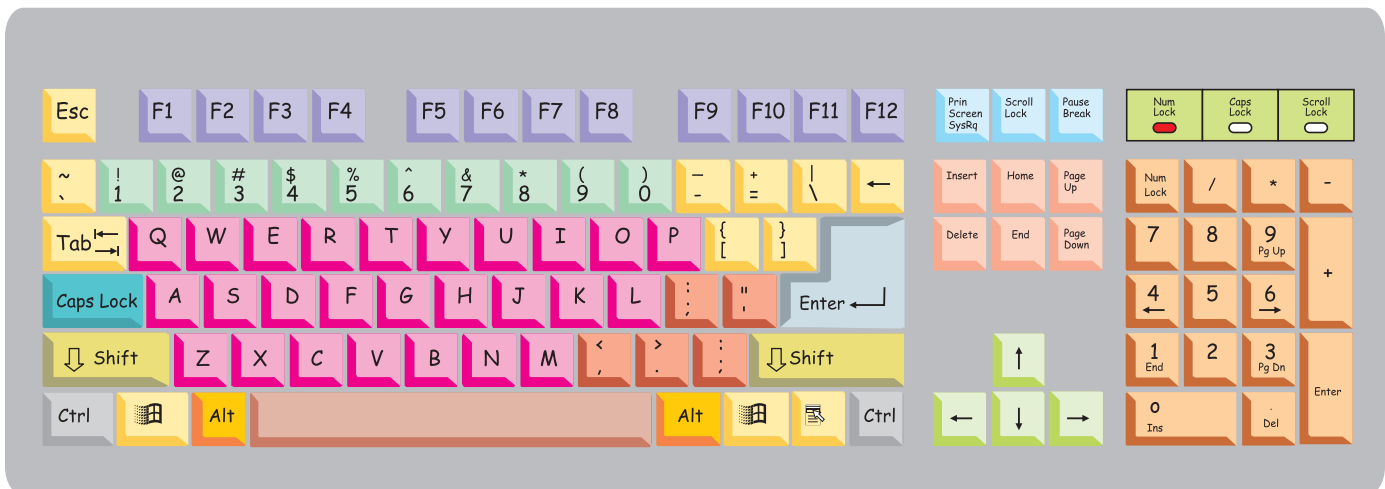

LICKC

EUSMO

Children! Can you guess this computer part?
Well, this is the KEYBOARD.

- ★ Generally, a keyboard is cream, gray or black in colour.
- ★ It has 101 to 105 keys.
- ★ Keyboard is used for typing on the computer.
- ★ We also use a keyboard to play some games.

Keys On The Keyboard

There are three types of keys on the keyboard :

1. Alphabet Keys
2. Number Keys
3. Special Keys

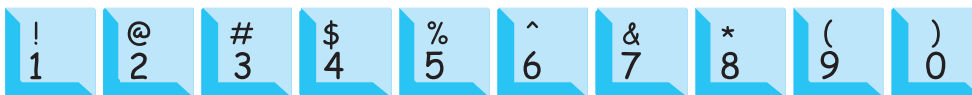

Alphabet Keys

The keys from A – Z are known as **alphabet keys**.

- ★ There are 26 alphabet keys on the keyboard.
- ★ When we press an alphabet key, the alphabet appears on the screen.
- ★ Alphabet keys are used to type letters, words and sentences.

Number Keys

- ★ Some keys have numbers on them.
- ★ These are the number keys.
- ★ There are two sets of number keys on the keyboard—above the alphabet keys and on the number key pad.
- ★ Thus, there are 20 number keys on the keyboard.

Special Keys

All other keys of the keyboard are special keys.

Let us learn about a few.

Function Keys

Function keys or F keys are linked across the top of the keyboard and labelled F1 through F12. These keys are used to perform different functions.

Enter Key

This is the Enter Key.

- ★ It is used to move the cursor to the next line while typing.
- ★ There are two Enter keys on the keyboard.

Spacebar Key

- ★ This is the Spacebar Key.
- ★ It is the longest key on the keyboard.
- ★ It is used to give a space between two words while typing.

Backspace Key

- ★ This is the Backspace Key.
- ★ This key is used for erasing the characters to the left of the cursor.
- ★ It is on the top-right corner of the alphabet keys.

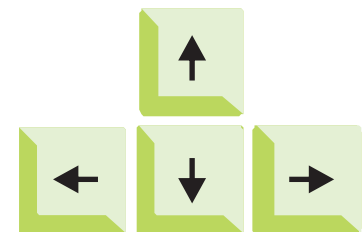

It's a Fact!

Cursor is a blinking horizontal line on screen. It shows the position of letter, digit we input from keyboard.

Arrow Keys

- ★ These are the Arrow Keys.
- ★ They are used to move the cursor up, down, left and right on the screen.
- ★ There are 4 arrow keys on the keyboard.
- ★ They are also called the **Navigation Keys**.

Activity Corner

Learning to Know CG-1.1

Look at the keyboard.

What letter comes :

1. Between letter T and U.
2. Right to the letter K.
3. Left to the letter D.

Mouse

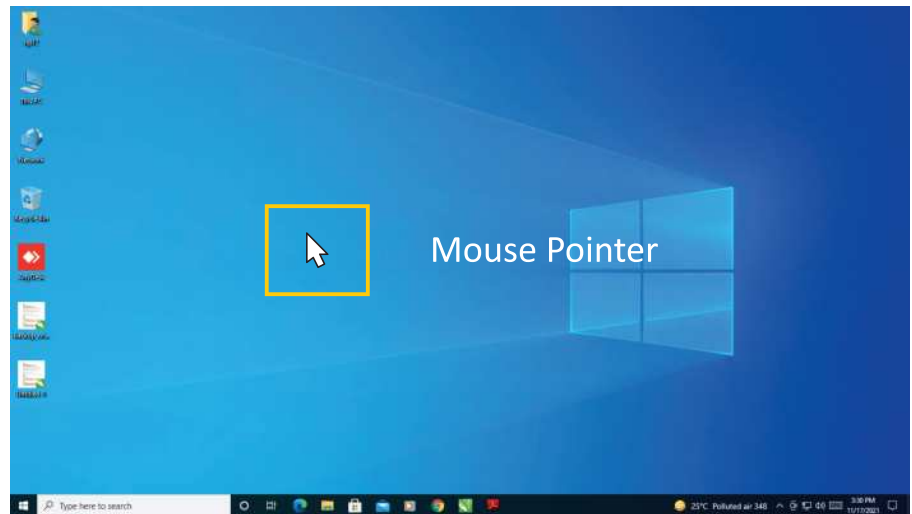

A computer mouse is another important part of the computer. It is held in the hand. When we move the mouse, an arrow moves on the screen.

We use a mouse to point at things on a monitor. So, it is called a pointing device.

It is also used to draw and paint.

Mouse

Activity Corner

Cooperative learning CG-3.2

Label the parts of a mouse using hints.

Left button
 Scroll Wheel
 Wire
 Right Button

Types Of Mouse

Two Buttoned Scroll Mouse

Most computer mouse have two buttons — left button and the right button. They also have a scroll wheel to move the screen content up and down.

Three Buttoned Mouse

Some mouse have three buttons. They do not have a scroll wheel.

It's a Fact!

Wireless mouse do not have a wire.
It is connected using wireless method or by bluetooth.

Holding A Mouse

- ★ Relax your hand gently on the side of the mouse.
- ★ Place your thumb on the side of the mouse.
- ★ Place your index finger on the left button and middle finger on the right button.
- ★ Use your index finger to move the scroll wheel of the mouse.
- ★ Always place the mouse on the mouse pad.

Mouse Actions

Click

Click means to press the mouse buttons.

We click the left mouse button to select things on monitor.

We click the right mouse button to open a pop-up menu.

Left Click

Right Click

Single-Click

The act of pressing the left mouse button once is called **single-click**. It is used to select a thing.

Double-Click

The act of pressing the left mouse button two times quickly is called **double-click**. It is used to open a file or folder.

Drag and Drop

Drag and drop means to move the things on monitor from one place to other. We can drag and drop by pressing the left button and moving the mouse while keeping the button pressed.

Summary

Keyboard/Mouse Usage Skills CG-2.1, CG-3.3

- There are 101 to 105 keys on the keyboard.
- Alphabet keys are used to type words and sentences.
- Number keys are used to type numbers.
- Keys like Function, Spacebar, Enter, Backspace, Arrow are called special keys.
- A mouse is used for pointing and selecting things.
- A mouse has two buttons and a scroll wheel.
- Left button is used to select and drag things on the monitor screen.
- Scroll wheel is used to move the pages up and down.

Tux Paint is Fun !

Learning Objective

- ◆ Starting Tux Paint
- ◆ Tux Paint Tools
- ◆ Parts of Tux Paint
- ◆ Save a Picture
- ◆ Colours in Starter Drawings

Warm Up

Practical/Artistic Skill CG-3.1

Colour the image beautifully.

Tux Paint is a fun program that helps us to draw and colour on the computer.

It is a free program that can be downloaded by anyone.

Tux Paint has many tools which makes drawing and colouring very easy for children.

Let us learn how to work on Tux Paint.

24

Computer-1

Starting Tux Paint

It is a drawing program that you can use to draw and colour the pictures. We can add text to the images to create picture stories.

Follow the following steps to open Tux Paint :

Step 1 : Click on the **Start** button.

The Start menu will open. A list of all programs appears on the left side.

Step 2 : Scroll down to find the **Tux Paint** folder. Click on it.

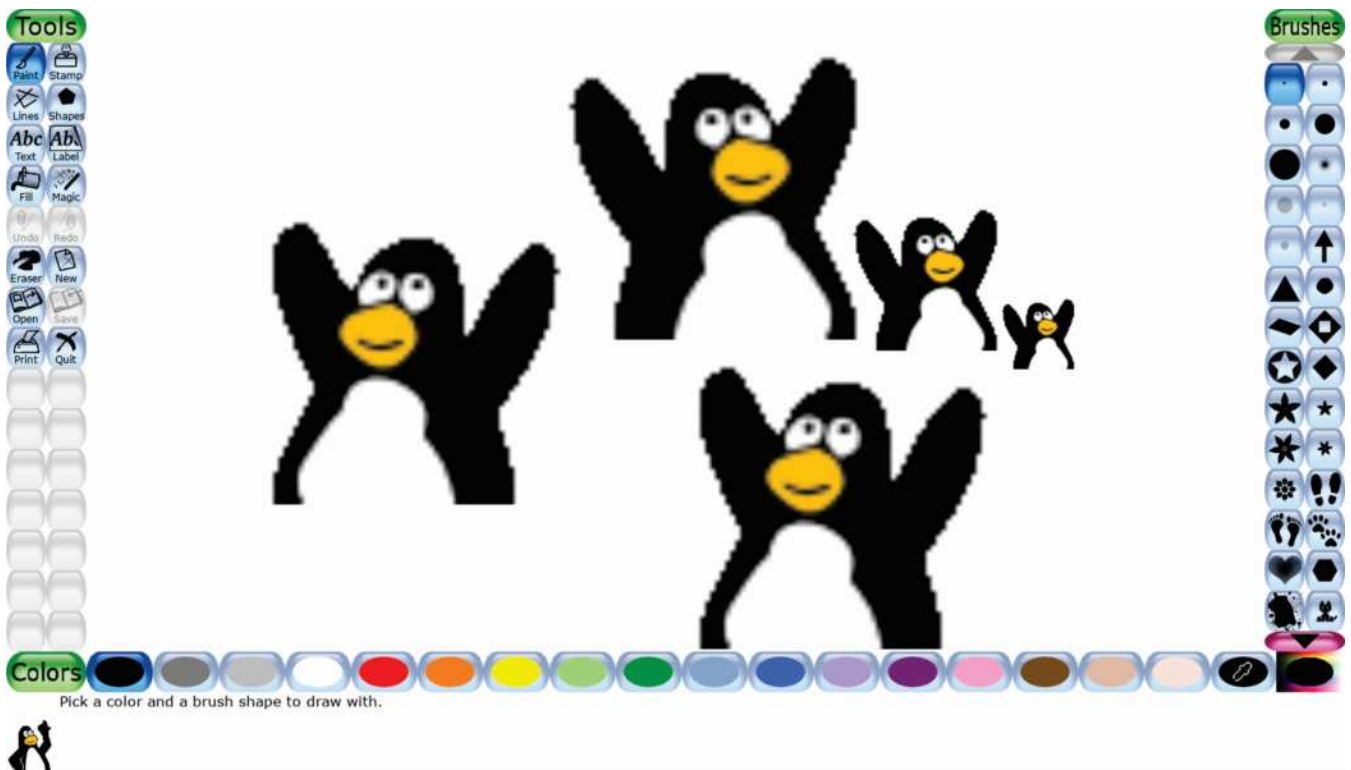

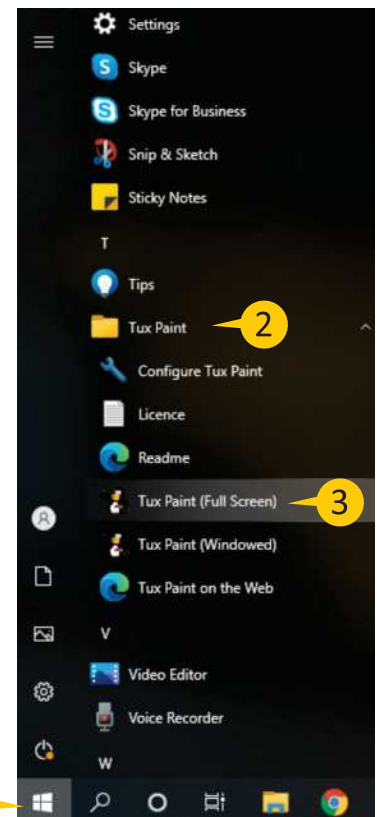

Step 3 : Then, click **Tux Paint (Full Screen)** to open it in full screen.

OR

Click on **Search** button from taskbar.

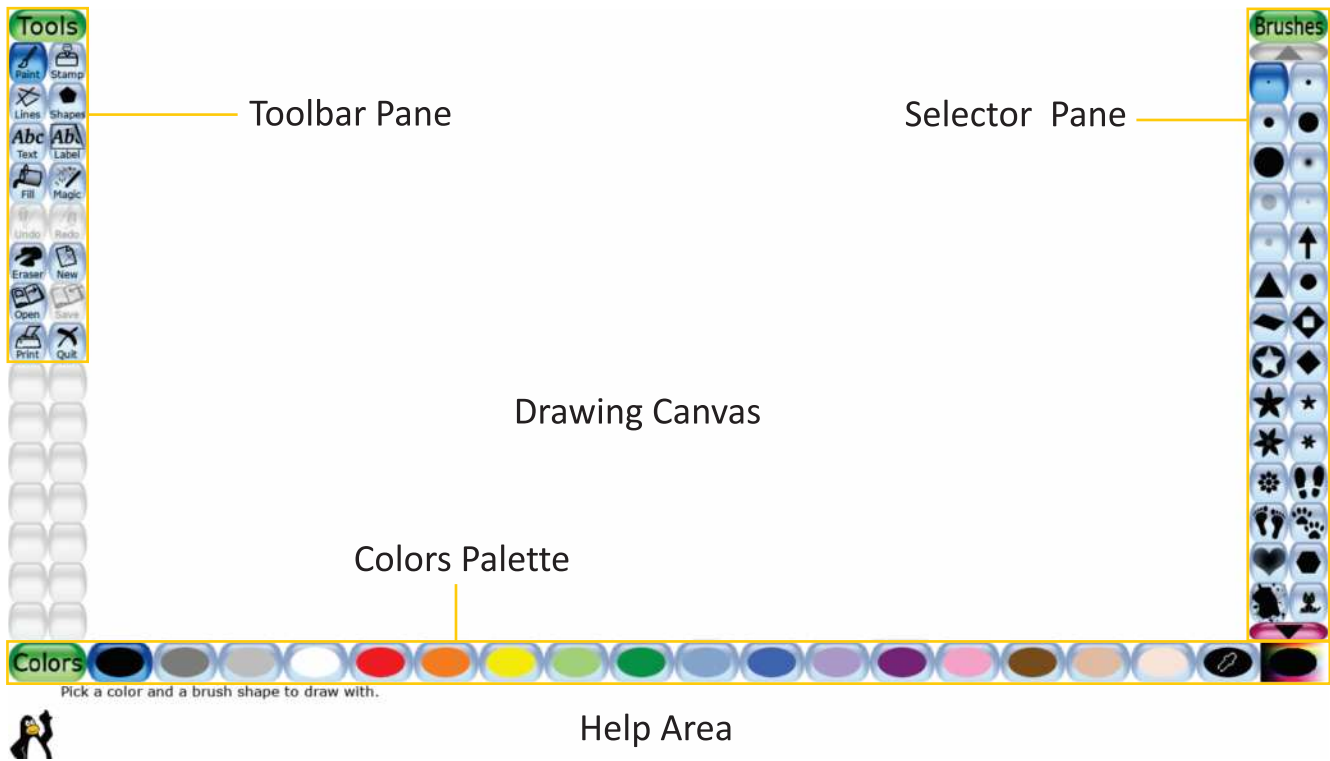

Type **Tux Paint (Full Screen)** in the search bar and press the **Enter** key.

The Tux Paint program will open on the computer screen.

Parts Of Tux Paint

Let us learn more about parts of Tux Paint Window.

Toolbor Pane : It has all the pencils and brushes for drawing.

Selector Pane : It has different options for tools like different sizes for brushes and pencils which we can use for our drawing.

Drawing Canvas : It is a blank page on which we can draw whatever we want to.

Colors Palette : It has many different colours which you can use for your drawing.

Help Area : This penguin tux helps us in every step while drawing and colouring.

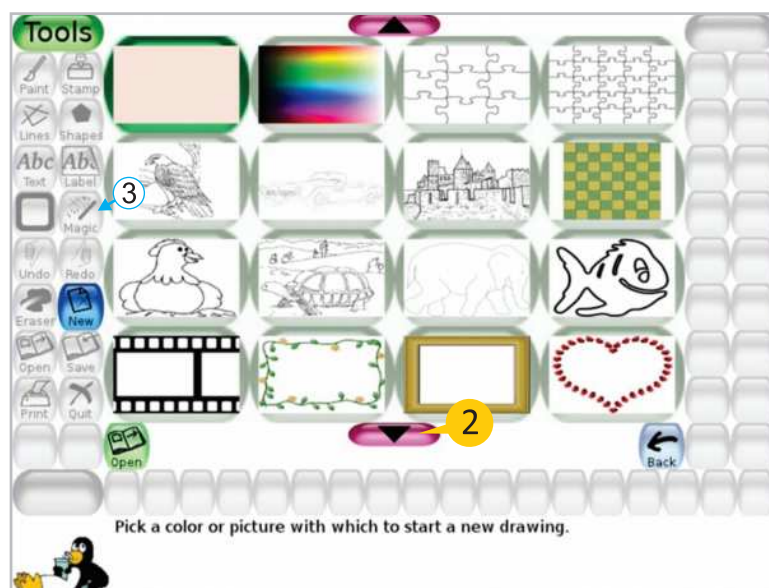

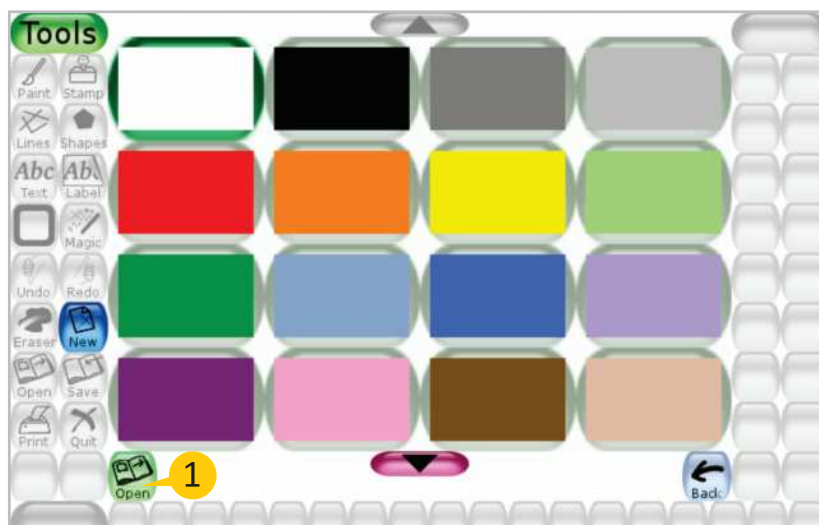

Colours In Starter Drawings

In Tux Paint, you have a lot of starter drawings which can be used as colouring pages.

Follow these steps to use starters and colour them :

Step 1 : Click on **New** button.

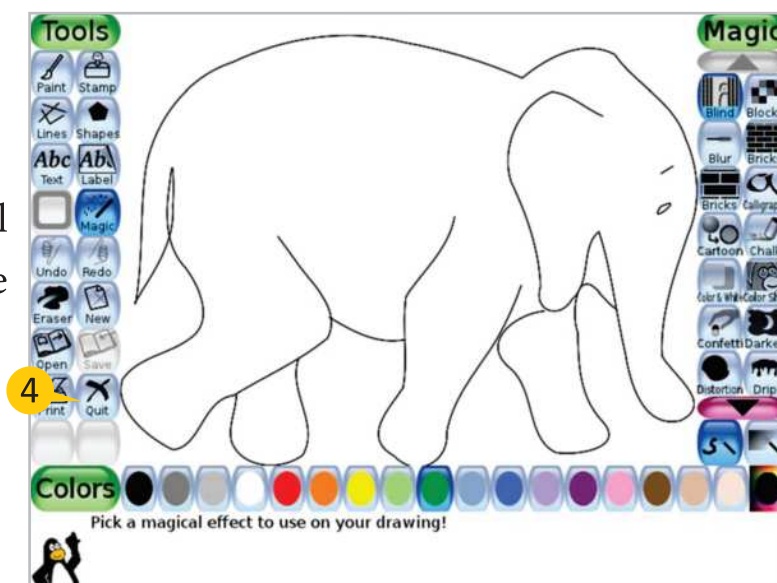

Step 2 : Using the **pink down arrow** key, scroll down to find the starter images.

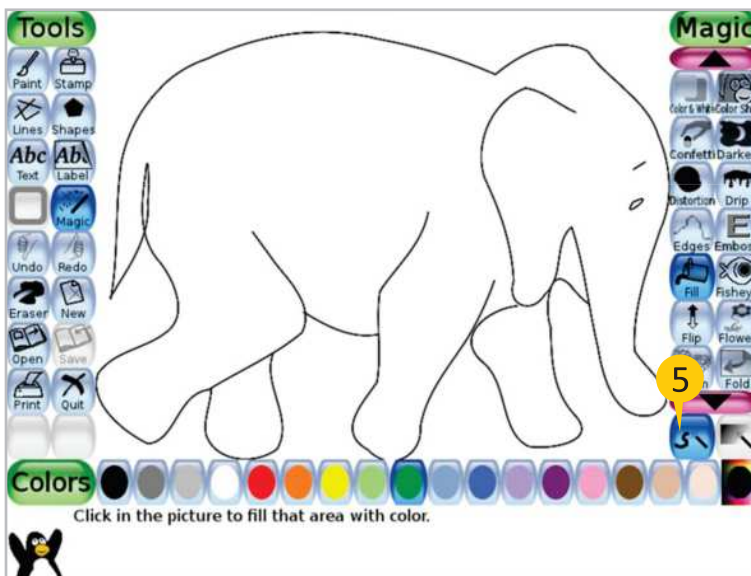

Step 3 : Double-click on any starter to use it.

Step 4 : Click on the **Magic** Tool from the toolbar pane.

Step 5 : From the selector, scroll down and click on the **Fill** effect.

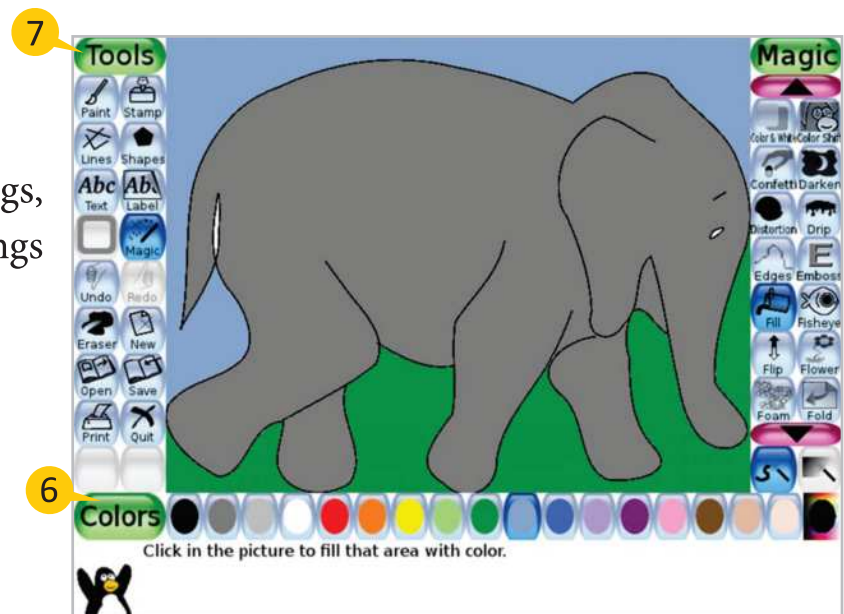

Step 6 : From the **Colors** palette, click on the colour of your choice.

Step 7 : Click inside the drawing to fill with colour.

Apart from the starter drawings, we can make our own drawings with the help of tools.

Let us learn about some of them.

Tux Paint Tools

Paint Tool

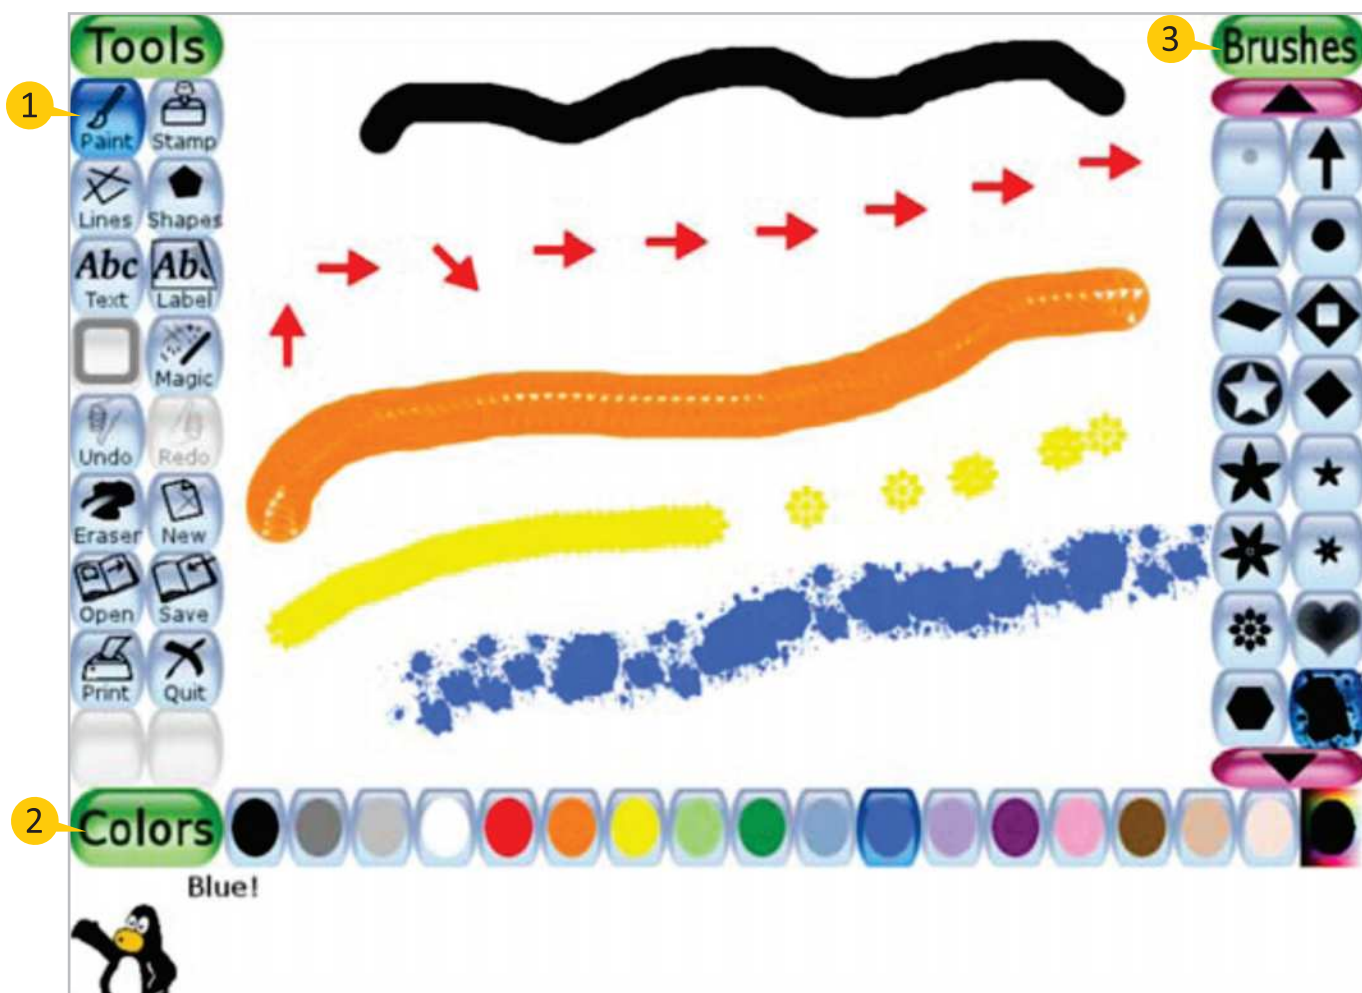

Follow the steps to draw by using coloured brush :

Step 1 : Select the **Paint** Tool from the toolbar pane (When you select this, the mouse pointer will change into a brush).

Step 2 : Select any colour from **Colors** palette.

Step 3 : Choose a shape of brush from **Selector** pane.

Step 4 : Now, bring the brush to the **Drawing Canvas** and click the **left mouse button** to start drawing.

Shapes Tool

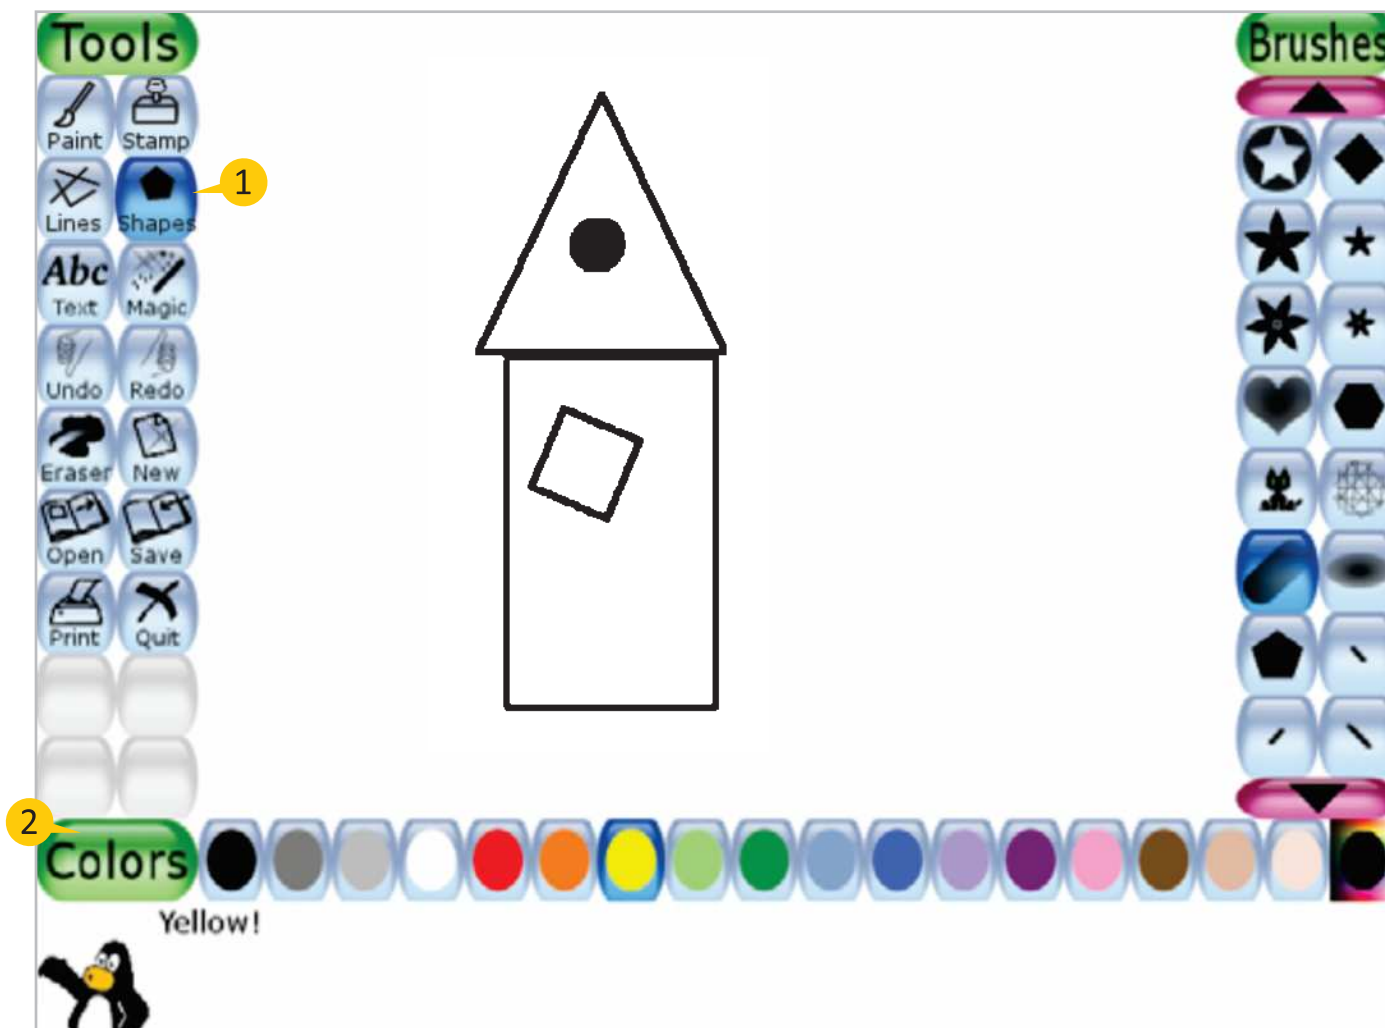

Follow the steps to draw a simple closed shape :

- Step 1 : Select the **Shapes** Tool from the toolbar pane (when you choose this option, the mouse pointer will change into a drawing pointer).
- Step 2 : Select the colour from the **Colors** palette and the shape from Selector pane.
- Step 3 : Bring the pointer on the drawing canvas and click the **left mouse button** to start drawing the shape.

It's a Fact!

Tux Paint was started in 2002 by Bill Kendrick.

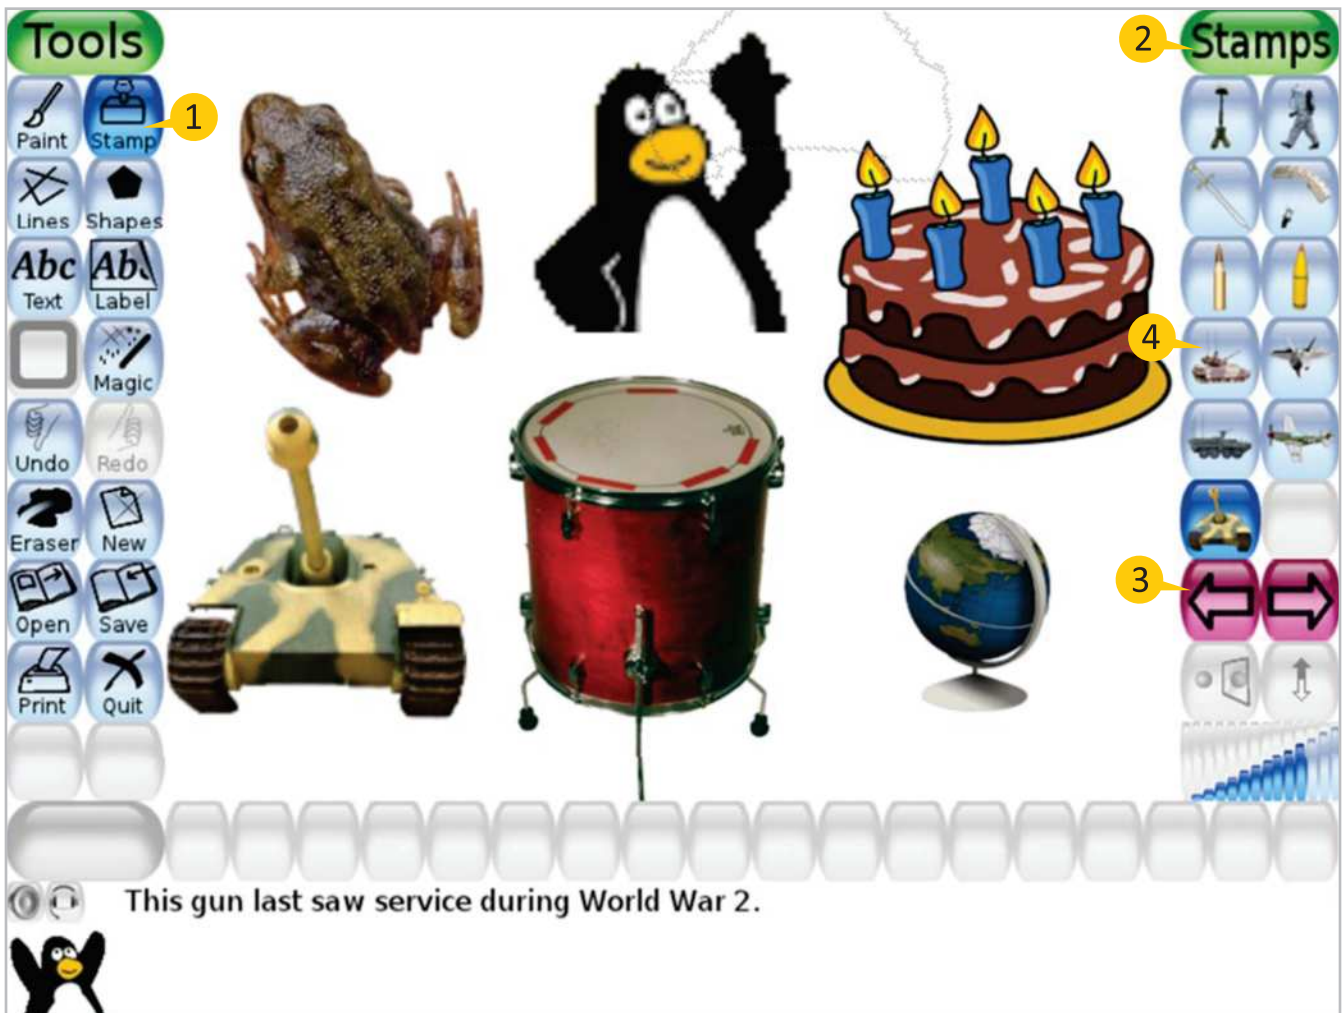

Stamp Tool

It is a collection of ready-made pictures that can be used as drawing.

Follow the steps to use Stamp tool :

- Step 1 : Click on the **Stamp** Tool.
- Step 2 : Select the type of stamp from the **Selector** pane.
- Step 3 : To change the stamp, click on the **pink left and right arrow** buttons.
- Step 4 : Click to select the Stamp you want.
- Step 5 : Click on the **Drawing Canvas** to place the stamp on your drawing.

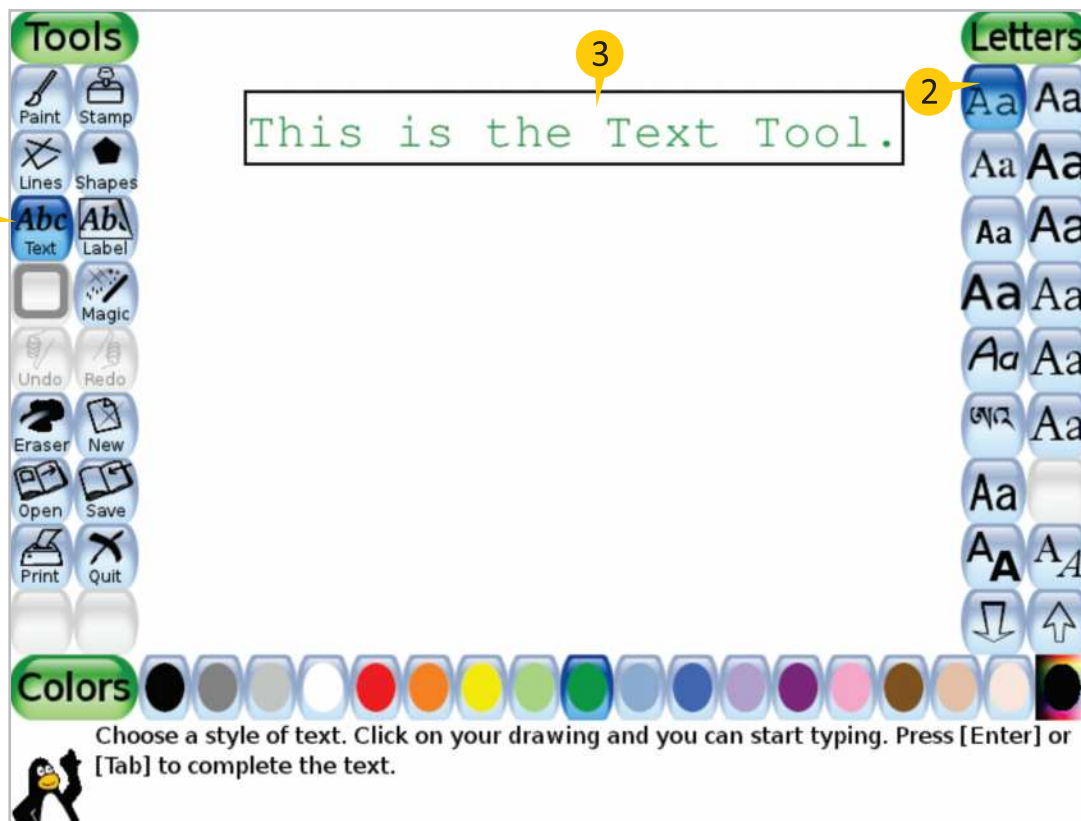

Text Tool

It is used to type any text in the drawing.

Follow the steps to use Text tool :

- Step 1 : Click on the **Text** Tool.
- Step 2 : Select the type of font from the **Selector** pane.
- Step 3 : Click the mouse on the **Drawing Canvas** where you want to type.
- Step 4 : Type using the keyboard.
- Step 5 : Click on any other tool when done.

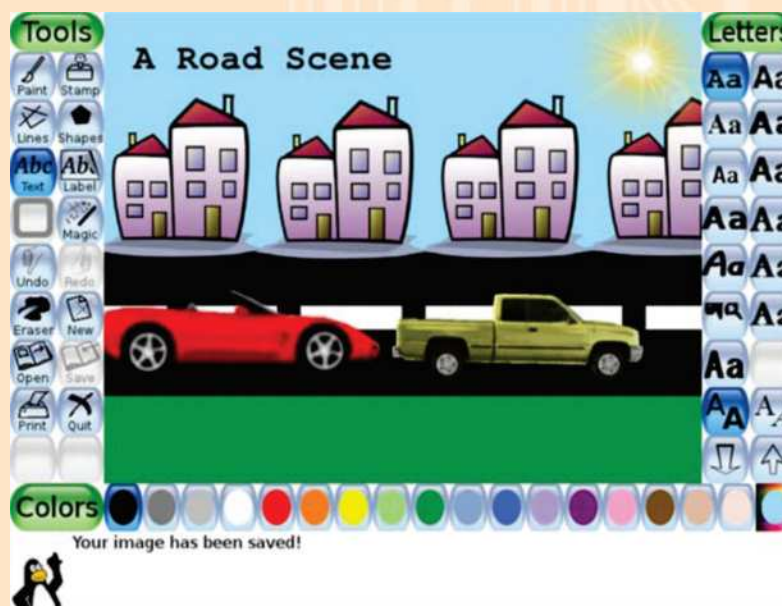

Activity Corner

Color Theory & Aesthetic Sense CG-3.7

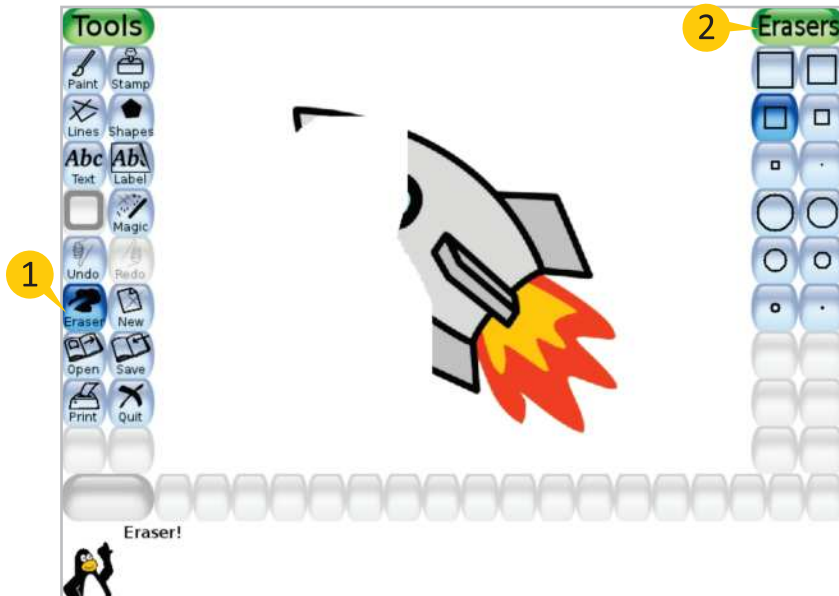

Draw and colour a Road Scene as shown.

Eraser Tool

Follow the steps below to erase a part of your drawing :

- Step 1 : Select the **Eraser** Tool from the toolbar pane.
- Step 2 : Choose the shape and colour of eraser from **Selector** pane.
- Step 3 : Bring the eraser cursor on the **Drawing Canvas**. Then press and hold the **left mouse button** over the area you want to erase.

It's a Fact!

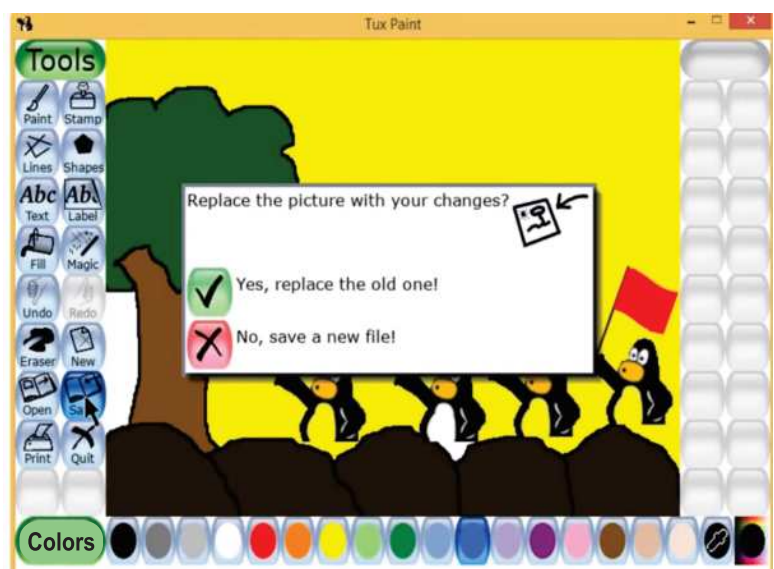

Click on the Quit button in the toolbar pane to exit Tux Paint.

Save A Picture

Follow the steps to save your drawing :

- Step 1 : Click on the **Save** button in the toolbar pane.

That's it! When your image is saved, you will hear a sound and also message will appear on the **Help Area** showing 'Your image has been saved !'

Summary

Text & Communication Skills/ Practical/Hands-on Skill CG-2.2,

- Tux Paint is a drawing program that helps us to draw and colour on the computer.
- We can find many starter pictures in Tux paint.
- We can type any text in the drawing.
- Save tool helps us to save our drawing for future use.
- Open tool helps to open a picture.

Step into Artificial Intelligence

Only for reading

Learning Objective

- ◆ Meaning of Artificial
- ◆ Artificial Intelligence (AI)
- ◆ Meaning of Intelligence

Computer is a smart machine. But when it behaves like a human, it becomes smarter, called **Machine Intelligence** or **Artificial Intelligence**.

Artificial Intelligence is everywhere around us. It shapes a lot of the decisions we make every day. It is both fun to learn and understand about AI. Take the plunge into the fascinating world of AI.

Meaning Of Artificial

Artificial means something which is made by humans. These things are not natural or real.

Artificial things seem like natural things.

Now, look at the pictures of some artificial things that are the copies of natural things.

Natural
Animals →

Artificial
Animals →

Meaning Of Intelligence

Intelligence is the ability to understand, learn and think from past experience. This ability helps to deal with new situations.

You are able to learn and understand things quickly and easily. But as soon as you become intelligent, you start thinking and doing correct things on your own.

Let us understand this with the help of an example.

When you drink a hot soup, you will burn your mouth. You immediately spill it out of your mouth. When this happens to you for the first time, the happening (burning of your mouth) gets stored in your brain.

This is called an **experience**.

This experience helps you to deal with it next time. Your intelligence will decide not to drink the soup without blowing it based on your past experience.

A child drinking
hot soup

Artificial Intelligence (AI)

Artificial Intelligence is the art of teaching computers or robots how to 'think' intelligently. It is the ability of a machine to perform functions as humans do, such as learning and solving problems.

Robot

Think of a robotic dog that obeys your commands, talks to you, brings you food and even finds your lost things. What if it helps in your homework! Wouldn't that be great?

All this can be made possible by the technology of Artificial Intelligence (AI).

Robot dog

Look at some digital assistants around you.

Amazon's Alexa

Apple's Siri

Google Nest

Cortana

These assistants use AI to help you and perform different tasks.

Test Paper

A. Tick (✓) the correct option.

- An aeroplane flies in the _____.
a. sky ☐ b. underwater ☐
- A monitor screen _____ the work that we do on the computer.
a. displays ☐ b. does not displays ☐
